Geneticist driving advancements in genomics and personalized medicine

Experienced geneticist with over eight years of experience in DNA sequencing, gene editing, and molecular diagnostics. Specializes in CRISPR-Cas9 applications and population genetics research.

PROFESSIONAL EXPERIENCE

Geneticist | July 2018 – Present

Seattle Genomics Research Center, Seattle, WA

- Conduct genomic editing experiments leading to two published breakthroughs in rare disease gene therapy
- Collaborate with bioinformatics specialists to develop new genetic data analysis pipelines

Research Associate | August 2015 – June 2018

University of Washington, Seattle, WA

- Analyzed genetic markers across diverse human populations for public health research projects
- Co-authored multiple papers in top-tier journals including Nature Genetics

KEY SKILLS

- CRISPR gene editing
- Genetic data analysis
- Population genetics
- DNA sequencing technologies
- Genomic medicine

EDUCATION

Bachelor of Science (B.S.) in Genetics

University of Washington, Seattle, WA May 2015
