## Critical Access ER Nurse

Resourceful critical access ER nurse with six years of experience providing emergency care in rural hospitals with limited resources. Skilled in independent decision-making, emergency stabilization, and coordinating patient transfers to larger facilities.

### EDUCATION

Master of Science in Nursing  
(MSN)

University of North Dakota  
September 2020

Bachelor of Science in Nursing  
(BSN)

University of North Dakota  
June 2018

### KEY SKILLS

- Emergency care in resource-limited settings
- Telemedicine and remote consultations
- Trauma stabilization and transport coordination
- Advanced wound and cardiac care
- Independent decision-making under pressure

### PROFESSIONAL EXPERIENCE

Critical Access ER Nurse | CHI St. Alexius Health, Bismarck, ND  
June 2020 – Present

- Manage emergency care for an average of 25 patients per shift in a rural hospital setting with minimal specialty support.
- Initiated telemedicine consultations with trauma centers, reducing unnecessary patient transfers by 30%.
- Perform advanced wound care, cardiac monitoring, and emergency airway management without immediate specialist backup.

ER Nurse | Sanford Health, Bismarck, ND  
September 2018 – December 2020

- Provided rapid assessment and stabilization for trauma patients in a critical access setting.
- Implemented a trauma team training program that improved response times by 22%.
- Assisted in creating a rural patient transport protocol, improving transfer efficiency to larger hospitals.

### CERTIFICATIONS

- Certified Emergency Nurse (CEN): Board of Certification for Emergency Nursing, December 2020
- Advanced Cardiac Life Support (ACLS): American Heart Association, November 2018
- Registered Nurse (RN): North Dakota, March 2018
