KEY SKILLS

- Adaptability
- Back-end development
- Cloud computing
- Collaborative teamwork
- Database management: MongoDB, MySQL
- Testing frameworks: JUnit, Selenium

CERTIFICATIONS

- Certified Software Development Professional, IEEE Computer Society, December 2020
- Certified Secure Software Lifecycle Professional, ISC2, February 2017

Michael Jackson

Results-oriented software developer with a strong background in full-stack development and experience in Agile environments seeking a position with Edge360. Proficient in JavaScript, Node.js, React, and Ruby on Rails. Delivers quality code and builds scalable applications using over five years of experience and knowledge.

EDUCATION

Bachelor of Science (B.S.) Software Engineering
Iowa State University, Ames, IA | June 2017

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER

LATITUDE, INC., REMOTE | OCTOBER 2020 – PRESENT

- Collaborate with senior developers to design and develop web-based applications, launching three major projects within 12 months
- Improve system uptime and create scalable solutions for future growth
- Migrate approximately four large-scale software systems to a new cloud-based infrastructure each year
- Conduct daily code reviews, providing feedback and suggestions to improve overall code quality, which resulted in a resolution of over 150 code defects
- Grow user base by integrating third-party applicant programming interfaces (APIs) into existing applications

JUNIOR SOFTWARE DEVELOPER

BEACONFIRE SOLUTION, PRINCETON, NJ | JUNE 2017 – OCTOBER 2020

- Assisted in the setup of continuous integration and continuous delivery or deployment (CI/CD) pipelines to reduce average deployment time from several hours to 30 minutes
- Streamlined data modeling and schema design for multiple projects using MySQL and MongoDB
- Processed over 1TB of data per month to improve data analytics capabilities
- Designed and implemented automated testing scripts using Selenium and JUnit to reduce manual testing time by 35%
- Helped with troubleshooting and debugging issues in the software development life cycle (SDLC) to ensure the timely delivery of high-quality code
