## KEY SKILLS

- Jenkins & GitLab CI
- Ansible & Terraform
- Docker & Kubernetes
- Monitoring with Prometheus/Grafana

## EDUCATION

B.S. in Information Systems  
University of Texas at Austin, TX  
| May 2014

## PROFESSIONAL EXPERIENCE

DEVOPS DATA ENGINEER | DATAFLOW SYSTEMS, AUSTIN, TX  
APRIL 2018 – PRESENT

- Built and maintained Jenkins pipelines for ETL workflows, reducing deployment time from hours to minutes
- Implemented GitLab CI/CD for Dockerized data microservices, improving rollbacks and version control
- Automated infrastructure provisioning with Ansible and Terraform, cutting manual setup by 70%
- Monitored system health using Prometheus and Grafana, establishing SLIs and SLOs for data services

DATA ENGINEER | STREAMLINE ANALYTICS, AUSTIN, TX  
JANUARY 2015 – MARCH 2018

- Developed Python-based ETL scripts deployed via CircleCI into AWS environments
- Containerized Spark jobs with Docker and orchestrated on ECS, achieving consistent environments across dev and prod
- Integrated Helm charts for Kubernetes deployments, simplifying the rollout of new data features
- Collaborated with the security team to integrate secrets management with Vault

## CERTIFICATIONS

- Certified Kubernetes Administrator (CKA), June 2020
- Senior Big Data Engineer, Data Science Council of America, May 2019
