## Millwork carpenter

Skilled millwork carpenter with seven years of experience producing and installing precision custom cabinetry, architectural moldings, and decorative woodwork for residential and commercial projects. Proficient in CAD design integration, workshop production management, and apprentice supervision. Known for consistently increasing output, reducing material costs, and delivering millwork installations that meet the highest standards of accuracy and finish quality.

## KEY SKILLS

- Custom cabinetry production and installation
- Architectural millwork: crown, base, casings, wainscoting, coffered ceilings
- CAD design software integration (AutoCAD, Cabinet Vision)
- Workshop production management and output optimization
- Precision woodworking machinery operation (CNC router, shaper, wide-belt sander)
- Apprentice supervision and skills development
- Wood species selection, grading, and grain matching
- Surface finishing: lacquer, stain, polyurethane, paint
- Quality control and defect inspection

## Professional Experience

MILLWORK CARPENTER | PRESTIGE WOODWORKS, BOSTON, MA  
MARCH 2017 - PRESENT

- Designed and built 40+ custom cabinetry and architectural molding projects for residential and commercial clients, increasing overall workshop output by 25% through production process streamlining and CNC integration
- Managed and mentored a team of 3 apprentices through daily production tasks, quality reviews, and skills development sessions, achieving zero quality rejection rates on all supervised work
- Integrated CAD design software into the production workflow for all 40+ projects, reducing design-to-production time by 20% and improving dimensional accuracy on complex millwork profiles
- Operated CNC routers, wide-belt sanders, and spindle shapers to produce precision millwork profiles for 60+ custom projects, maintaining tolerances within 0.005 inches on all machine-cut components
- Selected and sourced premium hardwood and softwood species from 4 regional suppliers for 40+ projects, matching grain, figure, and color to architect and designer specifications
- Applied lacquer, paint, and stain finishes to 50+ millwork installations using HVLP spray systems, achieving zero finish rejections on client walk-throughs over 7 years
- Reduced material waste by 15% through optimized panel layout software and systematic offcut reuse protocols, saving approximately \$12,000 annually in material costs

## Education

- Diploma in Advanced Woodworking  
Boston Technical Institute, Boston, MA | February 2017

Relevant Coursework: Cabinet Making, Architectural Millwork, CAD for Woodworking, Workshop Management

## Certifications

- Journeyman Carpenter Certificate | Massachusetts Department of Labor | March 2020
- OSHA 10-Hour Construction Safety | OSHA | September 2019
