KEY SKILLS

- Structural framing: walls, ceilings, floors, and roofs
- Drywall installation and finishing
- Door, window, and cabinetry installation and alignment
- Blueprint and specification interpretation
- Power and hand tool operation (circular saws, nail guns, levels, squares)
- OSHA safety compliance and incident reporting
- Material estimation, procurement, and waste management
- Subcontractor collaboration and workflow coordination
- Quality control inspection and punch list execution

EDUCATION

Associate Degree in Carpentry
Community Technical College, City, ST
December 2015

PROFESSIONAL EXPERIENCE

- **Construction Carpenter, Apex Builders, City, ST**
July 2019 – Present
 - Framed walls, ceilings, and floors for 25+ residential and commercial buildings using precision measurements, maintaining dimensional tolerances within 1/8 inch on all structural components
 - Installed 200+ doors, windows, and cabinet units across multiple projects, ensuring proper alignment, plumb, and functionality with zero callback requests on completed installations
 - Adhered to construction safety standards across all active sites, contributing to a 30% reduction in workplace accidents through consistent PPE use, hazard identification, and daily safety briefings
 - Read and interpreted architectural and structural blueprints for all 25+ projects, translating specifications into accurate field installations without deviation from engineered drawings
 - Collaborated with 8 subcontractors including electricians, plumbers, and HVAC installers to coordinate work sequencing and prevent material conflicts across all phases
 - Managed material orders and waste disposal for each project phase, reducing per-project material overruns by an average of 12% through accurate pre-cut planning
 - Completed all framing and finish installations within established project timelines, contributing to a 100% on-time delivery record across all 2022 and 2023 projects
- **Carpenter Apprentice, Legacy Construction, City, ST**
June 2017 – July 2019
 - Assisted senior carpenters in material cutting, assembly, and installation of structural components across 15+ residential projects, developing foundational skills across all construction phases
 - Read and interpreted blueprints under journeyman supervision, developing proficiency in structural drawings and specification sheets over a 2-year apprenticeship
 - Maintained a clean and organized workspace on all active sites, implementing a tool and material staging system that improved crew efficiency by 25%

CERTIFICATIONS

- OSHA 10-Hour Construction Safety, OSHA, September 2022

- Journeyman Carpenter Certificate, State Department of Labor, July 2021
