KEY SKILLS

- Kotlin, Java
- Jetpack Compose, View system
- Coroutines, Flow
- Retrofit, OkHttp, Room
- Hilt, Dagger basics
- JUnit, Espresso, MockK
- Git, GitHub Actions

Professional Experience

ANDROID DEVELOPER | HALEWIND SOFTWARE, MADISON, WI
AUGUST 2023 - PRESENT

- Build screens in Jetpack Compose for a B2B inventory app used by about 14,000 warehouse staff each week.
- Wrote the barcode-scan flow with CameraX, which replaced a third-party SDK and removed a \$1,200/month license.
- Fixed 27 bugs in the first six months, including a memory leak in the image gallery surfaced by LeakCanary.
- Pair with two senior devs on PR reviews and take notes on architecture decisions for the team wiki.

Education

- B.S. Computer Science
University of Wisconsin-Madison | May 2022
- Google Associate Android Developer (2023)

PROJECTS

Personal Apps

June 2022 - July 2023

- Published HikeLog, a Compose + Room app for tracking trail miles, with 4.6 stars across 380 reviews.
- Built a small Wear OS companion using Health Services API to read heart rate during workouts.
- Wrote a blog series on coroutines and Flow that picked up around 9,000 reads on Medium.
