KEY SKILLS

- Tableau Desktop, Tableau Server, Tableau Prep
- SQL (Snowflake, Postgres), dbt basics
- LOD expressions, parameter actions, set actions
- Python (pandas) for data prep
- Tableau Desktop Specialist (2020), Tableau Certified Data Analyst (2023)

PROFESSIONAL EXPERIENCE

SENIOR TABLEAU ANALYST | BRIGHTLINE ANALYTICS, RALEIGH, NC MARCH 2021 – PRESENT

- Rebuilt a regional sales dashboard the leadership team checks every Monday, cutting load time from 47 seconds to under 6 by switching to extracts and pruning unused fields
- Own a portfolio of 38 published workbooks across finance, ops, and supply chain teams
- Coach 4 junior analysts on LOD expressions, set actions, and when a calculation belongs in SQL instead
- Standardized color and formatting rules so workbooks across the org feel like one product, not a patchwork
- Partnered with the data engineering team to redesign the source views, removing roughly a third of the joins our workbooks were doing client-side

TABLEAU ANALYST | MERCER HEALTH NETWORK, DURHAM, NC JUNE 2019 – FEBRUARY 2021

- Built clinic-level dashboards tracking patient wait time, no-show rate, and provider utilization across 22 sites
- Found a join error in the appointments view that had been overstating same-day cancellations by about 15% for two quarters
- Converted 60+ legacy Excel reports into Tableau workbooks, retiring the weekly PDF packet entirely
- Wrote the team's first style guide covering tooltip wording, axis formatting, and accessible color palettes

EDUCATION

- B.S. Statistics
North Carolina State University | May 2019
