EDUCATION

B.S. Computer Engineering, University of Minnesota, 2016

Salesforce Certifications: Platform Developer II, CPQ Specialist, Application Architect (in progress)

KEY SKILLS

- Apex (async, batch, queueable chaining)
- Lightning Web Components, Aura migration
- Salesforce CPQ, Advanced Approvals
- SOQL tuning, large data volume design
- REST/SOAP, Platform Events, Change Data Capture
- Gearset, Copado, SFDX CLI
- Experience Cloud, Service Cloud
- PMD, SonarQube, Apex test patterns
- Marketo, NetSuite, DocuSign integrations
- Agile coaching, code review leadership

ABOUT ME

Senior Salesforce Developer with 8 years across Sales Cloud, Service Cloud, and CPQ. Led a CPQ rebuild that supported \$12.3M in renewal revenue and replaced 6 legacy managed packages. Strong on Apex performance tuning, async patterns, and partnering with architects on solution design.

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer | 2021 - Present

Glassmoor Health Tech, Minneapolis, MN

- Led 4-developer pod through CPQ rebuild covering 210 sales users; project supported \$12.3M renewal book and retired 6 managed packages
- Refactored bulk-unsafe trigger framework using TDPM pattern, eliminating CPU governor limit errors that had hit production roughly weekly
- Designed Platform Event pipeline replacing 3 nightly batch jobs; downstream ERP now sees order data within about 30 seconds
- Run sprint code review for 8 devs; introduced PR template and Apex PMD gates that cut hotfix releases by more than half
- Mentor 3 mid-level developers on async Apex (queueable chaining, batch sizing) and LWC composition patterns

Salesforce Developer | 2018 - 2021

Ridgevault Financial, Saint Paul, MN

- Built Experience Cloud portal for ~6,200 advisor users with custom LWC dashboards backed by Apex REST
- Implemented Marketo integration via named credentials and Apex REST, replacing CSV uploads that brokers had complained about for 2 years
- Owned managed-package release process for an internal compliance app installed in 4 sister-company orgs
- Cut Apex test suite runtime from 47 minutes to 19 by introducing TestDataFactory and removing SeeAllData=true usage

Salesforce Developer | 2016 - 2018

Calderwood Media Group, Bloomington, MN

- Built Apex triggers and Visualforce pages for ad sales pipeline used by 90+ sellers
- Migrated legacy s-controls and JavaScript buttons to Lightning Actions during Classic-to-Lightning transition
- Partnered with admin team on weekly release deployments using Change Sets, later moving to Gearset
