KEY SKILLS

- TypeScript
- JavaScript
- React
- Python
- HTML/CSS
- Node.js
- PostgreSQL
- Jest unit testing
- Git and GitHub PR workflows
- AWS (S3, Lambda basics)
- REST APIs
- Agile and Scrum

PROFESSIONAL EXPERIENCE

Junior Software Engineer | Crateroute Logistics, Raleigh, NC
2023 - Present

- Built 14 React components for the driver app, including the route-detail screen used on every shift by 380 drivers.
- Wrote unit tests with Jest that raised frontend coverage from 41% to 68% over two quarters.
- Fixed a date-parsing bug in the dispatch console that was causing late deliveries to show as on-time once a week.
- Pair with the senior engineer on PR reviews and have started taking the secondary on-call shift on Wednesdays.

Software Engineering Intern | Crateroute Logistics, Raleigh, NC
Summer 2022

- Prototyped an internal Slack bot in Python that surfaced overnight pipeline failures to the on-call channel.
- Wrote SQL queries to validate a one-time data backfill across about 2.1M shipment rows.
- Shadowed the platform team and contributed a small docs PR to the deploy script README.

EDUCATION

B.S. in Computer Science, North Carolina State University, 2022

Relevant coursework: Data Structures, Databases, Software Engineering, Web Development

AWS Certified Cloud Practitioner, 2023
