EDUCATION

A.A.S. Industrial Maintenance,
Ivy Tech Community College,
2011

Journeyman Industrial Mechanic,
State of Indiana, 2016

**Certified Maintenance &
Reliability Technician (CMRT)**

KEY SKILLS

- PM program design
- PLC and HMI troubleshooting (Rockwell, Siemens)
- Hydraulic press maintenance
- Robotic weld cell upkeep (FANUC, ABB)
- Condition monitoring (vibration, thermography)
- MRO budgeting and vendor management
- CMMS administration (Maximo, eMaint)
- Capital project coordination
- Team leadership and training
- Root-cause analysis (5-why, fishbone)
- OSHA 30, NFPA 70E, confined space

ABOUT ME

Maintenance lead with 14 years in automotive parts and heavy fabrication plants. Builds and runs PM programs, mentors techs, and partners with engineering on capital projects. Track record of lowering downtime and tightening spare-parts inventory without growing headcount.

PROFESSIONAL EXPERIENCE

Maintenance Lead

Wabash Forge & Stamping, Fort Wayne, IN | 2019 - Present

- Lead a crew of 9 techs across three shifts supporting 14 stamping presses and 6 robotic weld cells
- Lowered plant downtime from 6.8% to 3.1% over 30 months through PM rebuilds and condition monitoring
- Own the \$480K annual MRO budget; reduced spare-parts carrying cost by 18% via vendor consolidation
- Run morning Tier 2 meetings with production and quality, drive root-cause on top 5 weekly issues
- Lead vendor coordination for two press installs, including foundation, power, and PLC integration

Senior Maintenance Technician

Midstate Auto Components, Indianapolis, IN | 2014 - 2019

- Maintained CNC machining centers, hydraulic presses, and overhead cranes
- Built PM routes for 80+ assets in Maximo and trained shift techs on execution
- Performed bearing analysis with SKF tools to catch failures before line stops
- Welded and fabricated guarding, fixtures, and ergonomic aids on the shop floor
- Mentored 6 apprentices through state-approved maintenance apprenticeship

Maintenance Technician

Heartland Metalworks, Kokomo, IN | 2011 - 2014

- Repaired press brakes, shears, and powder-coat conveyor ovens
- Diagnosed 480V motor and contactor issues across 3 production cells
- Supported daily PMs and emergency calls on rotating on-call schedule
- Helped retrofit an aging line with new VFDs and HMIs
