- PostgreSQL, Redis, Kafka
- AWS (ECS, Lambda, RDS), Terraform
- GitHub Actions, Datadog, PagerDuty
- REST and gRPC API design
- On-call and incident response

PRIYA RAMAN

Software Developer

Full-stack developer with 6 years building payments and customer-facing web apps in Python and TypeScript. Comfortable owning a feature from spec to on-call, and partnering with product to scope work that ships in two-week cycles.

PROFESSIONAL EXPERIENCE

2022 - Present

Software Developer II | Cresswell Pay, Portland, OR

- Rebuilt the checkout retry service in Go, cutting average failed-payment recovery time from 38 minutes to under 4.
- Led migration of 14 React components from class to hooks, reducing bundle size and removing a long-standing memory leak in the cart view.
- Pair-rotate on-call with two other developers; handle roughly 60% of overnight Sev-2 pages.
- Wrote the team's first runbook for Stripe webhook drift, used by support and engineering during peak Black Friday traffic.

2019 - 2022

Software Developer | Halverson Logistics Software, Beaverton, OR

- Shipped a driver dispatch UI in React and Django that replaced a third-party tool, saving the company about \$84,000 a year in license fees.
- Added unit and integration coverage on the routing service from 31% to roughly 78%.
- Mentored two interns through their first production deploys.
- Owned the Postgres upgrade from 11 to 14 with zero customer-visible downtime.

EDUCATION

B.S. Computer Science, Oregon State University, 2019
