KEY SKILLS

- TypeScript, JavaScript, Go
- React, Next.js, Vue
- Node.js, Express, NestJS
- GraphQL, REST, gRPC
- PostgreSQL, Redis, DynamoDB
- AWS, Terraform, Docker
- CircleCI, GitHub Actions
- Feature flags (LaunchDarkly)
- Mentoring and code review
- System design and architecture

PROFESSIONAL EXPERIENCE

SENIOR FULL STACK ENGINEER | TIDEMARK COMMERCE, PORTLAND, OR FEBRUARY 2020 – PRESENT

- Led the rewrite of the checkout service from a Rails monolith to a Next.js front end with a Go API, holding p95 latency under 220ms during a Black Friday weekend that processed \$18.6M
- Designed the feature-flag system used by all 9 product squads, cutting failed releases from about 1 in 6 to under 1 in 25
- Mentored 4 mid-level engineers, two of whom were promoted to senior within 18 months
- Owned the GraphQL schema review process and wrote the team's internal API style guide
- Drove the migration off a deprecated payment vendor with zero customer-visible downtime

FULL STACK ENGINEER | NORTHWAVE MEDIA, VANCOUVER, WA JUNE 2017 – JANUARY 2020

- Built the subscription billing portal in React and Node.js, serving around 75,000 paying subscribers at launch
- Cut a slow report query from 14 seconds to 600ms by adding a materialized view and a Redis cache layer
- Set up the CI pipeline on CircleCI, including Docker-based test runs and automated database migrations
- Ran biweekly architecture reviews with the platform team and the data engineering lead

EDUCATION

- B.S. Computer Engineering, Oregon State University | May 2016
