- TXV and metering device replacement
- Ductwork fabrication and retrofit
- Permit and inspection process
- ServiceTitan, Housecall Pro
- Apprentice training
- Customer quoting and option presentation

Anna Roberts

Hvac Technician

ABOUT ME

Journeyman HVAC technician with 6 years on residential and light commercial systems across the Front Range. Strong on heat pump diagnostics, high-altitude combustion tuning, and customer-facing repair quotes. EPA 608 Universal and NATE certified.

PROFESSIONAL EXPERIENCE

Journeyman HVAC Technician | Rocky Peak Heating and Cooling, Aurora, CO
2022 – Present

- Run a solo service van handling roughly 7 calls per day on furnaces, heat pumps, and rooftop units up to 7.5 tons.
- Generated \$312,800 in repair revenue in 2023 with an average ticket above the shop's median.
- Tune gas furnaces for high-altitude operation using a combustion analyzer; adjust manifold pressure and verify CO levels under 50 ppm.
- Pull and replace evaporator coils, install line set kits, and commission new heat pump installs with subcool and superheat checks.
- Train two apprentices on diagnostic flow and electrical safety lockout procedures.

HVAC Installer and Service Tech | Front Range Air Solutions, Lakewood, CO
2019 – 2022

- Installed and started up 90+ residential systems per year with a partner, including dual-fuel heat pumps and 95% AFUE furnaces.
- Diagnosed no-cool and no-heat calls on R-410A equipment, including TXV replacement and compressor electrical testing.
- Built and ran ductwork for basement and attic retrofits using flex, sheet metal, and insulated trunk lines.
- Pulled mechanical permits and passed city inspections on first walkthrough about 9 out of 10 times.
