priya.natarajan@example.com

Denver, CO 12345

KEY SKILLS

- EVD and ICP monitoring
- Targeted temperature management
- Mechanical ventilation and weaning
- Vasopressor and sedation titration
- Charge relief and bed flow
- Rapid response and code blue
- Precepting and competency teaching
- Epic charting
- Sepsis bundle compliance

ABOUT ME

ICU staff nurse with 4 years in a high-acuity neuro and medical ICU. Strong with vented, sedated, and unstable neuro patients, including EVD management and targeted temperature post-arrest. Often pulled to charge relief and rapid response coverage on night shift.

PROFESSIONAL EXPERIENCE

ICU Staff Nurse, Neuro/Medical ICU

Front Range University Hospital, Denver, CO | 2022 - Present

- Manage 2 ICU patients per shift in a 28-bed mixed neuro/medical ICU, including subarachnoid hemorrhage, status epilepticus, and septic shock.
- Set up and troubleshoot EVDs and ICP monitoring; trained 9 nurses on EVD zero-and-level technique during the unit competency push last winter.
- Charge relief on roughly 4 night shifts per month; handle bed flow, admissions, and family escalations.
- Reduced average central line dressing change overdue rate on my pod from a recurring problem down to under 5% through a simple weekly audit board.
- Active on the Code Sepsis committee; review monthly cases and feed findings back at shift huddle.

Step-Down RN, Pulmonary

Cedarwood Heart and Lung Hospital, Aurora, CO | 2020 - 2022

- Cared for 4 patients per shift on BiPAP, high-flow nasal cannula, and post-extubation monitoring.
- Identified 2 patients trending toward respiratory failure ahead of MET call criteria, escalating early enough to avoid intubation in both cases.
- Precepted 3 nurses transitioning from med-surg into step-down, including airway and ABG basics.

EDUCATION

Bachelor of Science in Nursing, University of Colorado Anschutz, 2020

CCRN (Adult), 2023

BLS, ACLS, NIHSS, CRRT competency (Prismaflex)
