

PRIYA RAGHAVAN

Full Stack Developer

Full stack developer with 6 years building React and Node.js applications for fintech and healthtech teams. Comfortable owning a feature from API design through production rollout, and known for cleaning up legacy code without breaking dashboards the business depends on.

PROFESSIONAL EXPERIENCE

- Full Stack Developer, Lumenpath Health, Raleigh, NC
2021 – Present
 - Rebuilt the patient intake flow in React and TypeScript, cutting average completion time from 7 minutes to under 3 and lifting form submissions by roughly a third
 - Designed a Node.js and PostgreSQL service that consolidated four legacy intake APIs into one, retiring about 12,000 lines of duplicated code
 - Wrote the test plan and Cypress suite that caught a HIPAA logging regression two days before release
 - Paired with two junior engineers on weekly code reviews and helped one of them move into an on-call rotation
- Software Engineer, Brightline Lending, Durham, NC
2018 – 2021
 - Built loan-status dashboards with React, Redux, and a Django REST backend used by around 140 underwriters daily
 - Shipped a Stripe payments integration that processed \$42M in its first year without a single chargeback dispute
 - Migrated background jobs from cron to a Celery + Redis queue, cutting failed retries by more than half
 - Owned the on-call runbook for the borrower portal and led the postmortem after a memory leak outage
