KEY SKILLS

- Commercial and medical gas system design per NFPA 99
- Multifamily and hospital plumbing rough-in and trim
- Permit pulling and code compliance under Minnesota Plumbing Code
- Crew leadership and manpower forecasting for 8-14 plumbers
- Three week look-ahead scheduling and labor budgeting
- GC coordination, RFI management, and submittal

PROFESSIONAL EXPERIENCE

Master Plumber / Project Foreman | Northland Mechanical Builders, Saint Paul, MN
2019 - Present

- Lead plumbing scope on hospital and senior living projects ranging \$1.8M to \$4.6M in contract value.
- Pull all plumbing and medical gas permits as the licensed master of record for the company.
- Manage crews of 8 to 14 plumbers across two concurrent jobs, including weekly manpower forecasts.
- Cut RFI turnaround from 9 days to 4 by sitting in on GC coordination meetings twice a week.
- Sign off on medical gas certification testing per NFPA 99 alongside the third party verifier.

Foreman Plumber | Twin Rivers Plumbing & Heating, Minneapolis, MN
2012 - 2019

- Ran rough-in and trim crews on multifamily projects up to 240 units.
- Built three week look-aheads and labor budgets that finished within 5% of estimated hours.
- Coordinated underground layout with civil and structural before slab pours.
- Earned Minnesota Master Plumber license in 2014 after completing required exam and experience.
- Trained 9 apprentices through journeyman, six of whom still work in the company.

Journeyman Plumber | Lakeside Mechanical, Bloomington, MN
2006 - 2012

- Performed rough-in, trim, and service on commercial restaurants, retail, and small medical clinics.
- Installed grease interceptors and ran specialty waste for lab and dental fit-outs.
- Took the lead on backflow testing and certification for the company's customer base.
- Promoted to foreman on smaller renovation work in final two years.

Apprentice Plumber | Lakeside Mechanical, Bloomington, MN
2002 - 2006

- Completed 4 year apprenticeship through Plumbers Local 34 in the Twin Cities.
- Logged hours across new construction, service, and remodel work.
- Passed Minnesota Journeyman exam on first attempt in 2006.

review

- Blueprint and isometric drawing interpretation
- Underground layout coordination with civil and structural trades
- Backflow prevention testing and certification
- Grease interceptor and specialty waste system installation
- Apprentice mentoring and journeyman development
- Preconstruction estimating and value engineering

- Recognized by foreman for fastest underground layout on a 60 unit townhome project.
