- PostgreSQL, SQLite
- Git, GitHub
- Jest, basic Cypress
- Python, Flask
- Agile / Scrum basics

ABOUT ME

Junior full stack developer with one year of professional experience and a strong portfolio of React and Express projects. Recently completed a bootcamp and shipped two production features at my current internship-to-hire role.

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer

Greyhawk Logistics, Columbus, OH | 2023 - Present

- Built a driver check-in screen in React that replaced a paper clipboard process for 28 warehouse dock workers
- Wrote Express endpoints and Postgres queries for shipment lookups, with unit tests covering 84% of the new module
- Fixed 23 bugs in the legacy jQuery dispatch portal during my first six months, including a timezone bug that was double-counting overnight loads
- Joined daily standup and sprint planning, and shadowed senior engineers on two production deploys per week

Software Engineering Intern

Ohio State University, College of Engineering, Columbus, OH | Summer 2023

- Built a small Flask app for a research lab to track participant survey responses, used by 4 grad students
- Migrated the lab's data export script from CSV to a SQLite-backed admin page
- Presented the project at the end-of-summer intern showcase to roughly 60 attendees

EDUCATION

B.S. Information Systems, Ohio State University, 2023

Hack Reactor Full Stack Bootcamp Certificate, 2023
