- Power BI
- SQL (intermediate)
- Variance analysis
- Driver-based forecasting
- Headcount planning
- SaaS metrics (ARR, NRR, CAC)

PROFESSIONAL EXPERIENCE

Senior FP&A Analyst I 2022 - Present

Brightloom Software, Charlotte, NC

- Own the consolidated monthly forecast across 4 business units, rolling up \$187M in annual revenue and presenting variances to the CFO every Wednesday.
- Rebuilt the headcount model in Pigment after the FY24 reorg, cutting forecast cycle time from 9 days to 3 and removing duplicate cost-center mappings.
- Partner with RevOps on pipeline-to-bookings conversion analysis; flagged a Q2 mid-market slowdown six weeks before it hit the P&L.
- Lead the annual planning process for G&A and R&D, including OpEx targets, capacity modeling, and quarterly reforecasts.

FP&A Analyst I 2019 - 2022

Hartwell Outdoors, Charlotte, NC

- Built weekly cash flow forecast used by the treasurer to manage a revolver draw during the 2020 retail shutdown.
- Automated the monthly variance pack in Power BI, replacing a 14-tab Excel deck and saving roughly two days of close time.
- Analyzed SKU-level margin across 1,200 active items; recommended discontinuing 84 underperformers, freeing about \$2.3M in working capital.
- Supported the Series C raise with cohort, unit economics, and TAM build-out for the investor data room.
