

Frank Rogers

Maintenance

Maintenance technician with 6 years across distribution and light manufacturing. Solid on conveyor systems, electrical troubleshooting up to 480V, and CMMS-driven PM work. Comfortable running second shift independently and coordinating with production supervisors.

PROFESSIONAL EXPERIENCE

2021 - Present

Maintenance Technician III | Silverstate Distribution Center, Reno, NV

- Maintain conveyors, scanners, label printers, and dock levelers across a 620k sq ft facility
- Cut MTTR on sortation faults from 22 minutes to 13 minutes by rebuilding troubleshooting flow cards
- Run second shift solo two nights a week, escalating only true emergencies
- Replace gearmotors, photo-eyes, drive cards, and rebuild divert arms on rotation
- Close 35-45 PM work orders per week in UpKeep CMMS

2018 - 2021

Maintenance Technician II | Sierra Pacific Beverage, Sparks, NV

- Worked on bottling line PMs: filler valves, capper torque heads, conveyor lubrication
- Diagnosed VFD trips and replaced encoders on case-packer drives
- Helped install a new palletizer, including running 3-phase power and air drops
- Cross-trained on boiler operations and chemical handling for CIP systems

EDUCATION

A.A.S. Industrial Technology, Truckee Meadows Community College, 2018

EPA 608 Universal Certification; OSHA 30-Hour
