

JOSEPH ANDERSON

Psychology

Minneapolis, MN 12345 | (612) 555-0176 | d.ashworth@example.com

Profile

Clinical psychologist with a decade of practice split between hospital-based neuropsychology and private outpatient work. Specialty in adult attention and mild cognitive concerns evaluations, plus short-term therapy for executive functioning. Comfortable running a testing practice and reporting to referring neurologists and psychiatrists.

Key Skills

- Adult neuropsychological assessment across intelligence, memory, and executive functioning
- Adult attention concerns evaluation and differential diagnosis
- Mild cognitive impairment and early dementia workup
- Short-term cognitive behavioral therapy for executive functioning
- Integrated report writing for neurology and psychiatry referrals
- Interdisciplinary case consultation and feedback sessions
- Supervision of postdoctoral fellows and practicum trainees
- Clinical interviewing and collateral history gathering
- Electronic health record and digital test scoring platforms
- Confidential documentation and record management
- PSYPACT-informed telehealth assessment practices
- Caregiver education and psychoeducation for cognitive decline

Professional Experience

Clinical Psychologist, Neuropsychology Service

Northgate Memorial Hospital, Minneapolis, MN | 2019 - Present

- Complete 6 to 8 adult neuropsychological evaluations per week, most referred by neurology for suspected cognitive decline, head injury sequelae, or adult attention concerns.
- Reduced report turnaround time from 22 business days to 11 by templating narrative sections and using a scoring software pipeline.
- Present findings in weekly interdisciplinary case conference with neurology, psychiatry, and speech-language pathology.
- Supervise one postdoctoral fellow per year through report drafting and feedback sessions.
- Serve on the hospital's cognitive screening protocol committee for the memory clinic.

Staff Psychologist

Lakeview Behavioral Associates, St. Paul, MN | 2016 - 2019

- Carried a mixed caseload of therapy and assessment, averaging 24 client-facing hours per week.
- Built a brief therapy protocol for adult attention concerns that became a standing offering across the group's four clinicians.
- Trained front-desk staff on managing crisis calls and warm handoffs to on-call clinicians.
- Represented the practice at referral events with local primary care groups.

Postdoctoral Fellow, Neuropsychology

Twin Cities VA Medical Center, Minneapolis, MN | 2014 - 2016

- Completed 90+ comprehensive neuropsychological batteries with veterans referred for cognitive concerns.
- Drafted integrated reports incorporating medical history, imaging, and behavioral observations.
- Co-led a caregiver education group for families of veterans with early-stage dementia.
