KEY SKILLS

- Electromechanical assembly to work instructions
- Static-safe handling and gowning protocols
- Cleanroom-adjacent line practices
- Small-parts handling and torque driver use
- Continuity and functional fixture testing
- Lot traceability and device build record documentation
- 5S and workstation organization
- Reading blueprints and assembly drawings
- Basic soldering and crimping
- Digital calipers and micrometers
- Nonconformance escalation and defect tagging
- Microsoft Excel and shop-floor data entry

PROFESSIONAL EXPERIENCE

ASSEMBLER I | CEDAR RIDGE MEDICAL DEVICES, ROUND ROCK, TX 2023 – PRESENT

- Assemble handheld infusion controllers to work instructions, averaging 46 units per shift against a target of 40.
- Follow static-safe handling, gowning, and lot-traceability procedures for a Class II device line.
- Run continuity and functional test steps on a fixture; escalated 12 fail codes in one quarter that traced back to a bad cable supplier.
- Keep station 5S scores above the cell average on weekly audits.

EDUCATION

- Assembly and Production Coursework, Austin Community College, 2022
- Round Rock High School, 2021
- Electronic assembly acceptability coursework, completed 2023
