- Supplier negotiation and scorecarding
- Incoterms 2020
- Inventory optimization and safety stock modeling
- 3PL and freight bid management
- Cross-functional facilitation with sales, finance, ops

ABOUT ME

Supply chain manager with eight years across procurement, inbound logistics, and sales and operations planning for consumer goods and industrial distribution. Comfortable owning a P&L slice, running weekly demand reviews, and rebuilding supplier scorecards after service failures. Known for pulling messy ERP data into decisions leadership can act on.

PROFESSIONAL EXPERIENCE

Supply Chain Manager | 2021 - Present

Halverson Home & Garden, Columbus, OH

- Own end-to-end planning for a 3,400-item seasonal category, from 18-month forecast to store-level replenishment across 62 DCs.
- Cut inbound freight spend by \$2.3M in 2023 by consolidating less-than-truckload lanes with two 3PLs and shifting eight overseas vendors so freight and insurance moved from the seller to our side of the port.
- Rebuilt the weekly sales and operations planning deck after a stockout crisis in Q2 2022; on-time-in-full climbed from the low 80s to the mid 90s within two quarters.
- Lead a team of four planners and one buyer, including onboarding two campus hires and rewriting the analyst training playbook.
- Partner with merchandising on quarterly assortment reviews and quietly kill roughly 200 tail SKUs a year that no longer pay for their shelf space.

Senior Supply Chain Analyst | 2018 - 2021

Brightwater Beverage Co., Cincinnati, OH

- Ran demand planning for the still-water portfolio, roughly \$180M in annual revenue across grocery and c-store channels.
- Built the first working forecast-accuracy dashboard for leadership; adoption across five category teams took about six months.
- Investigated a chronic short-shipment problem at the Louisville co-packer and traced it to a bill-of-materials error that had been quietly costing the plant a full pallet per run.
- Owned monthly inventory reconciliation with finance and closed variances that had sat open for over a year.

Supply Chain Coordinator | 2016 - 2018

Meridian Industrial Supply, Dayton, OH

- Placed and expedited purchase orders for fasteners and maintenance consumables across a 900-vendor base.
- Backfilled for the buyer on maternity leave and kept a \$4M open order book current for four months with no supplier escalations.

- Cleaned up 11,000 orphaned item records in the ERP so cycle counts would stop mismatching.
