EDUCATION

A.A.S. Medical Laboratory
Technology, Baton Rouge Community
College, 2022

Board of Certification, Medical
Laboratory Technician, 2022

KEY SKILLS

- Benchtop hematology analyzer
- Beckman AU480 chemistry
- Iris iQ200 urinalysis
- Manual differential review
- Phlebotomy (adult and pediatric)
- Specimen processing and send-outs
- Meditech LIS
- Daily quality control and maintenance logs
- Critical value call and read-back documentation

PROFESSIONAL EXPERIENCE

Medical Laboratory Technician | Bayou Grove Community Hospital, Baton Rouge, LA
2022 - Present

- Run hematology and urinalysis benches on evening shift, averaging around 180 complete blood counts and 90 urinalyses per shift.
- Perform daily quality control and instrument maintenance; log corrective actions in the lab information system the same shift they occur.
- Call critical values to nursing within the 15-minute lab policy window and document read-back per accreditation requirements.
- Cover specimen processing during the 3-6 PM emergency department rush when the accessioner is on break, keeping received-to-verified time under 45 minutes.

Lab Assistant (Phlebotomy and Processing) | Bayou Grove Community Hospital, Baton Rouge, LA
2021 - 2022

- Drew inpatient morning rounds on medical-surgical floors and processed specimens for chemistry and send-out testing.
- Handled reference lab send-outs to Mayo and LabCorp, including packaging dry-ice frozen specimens.
- Cross-trained on urinalysis while completing laboratory technician clinicals, which shortened the bench orientation after hire.
