KEY SKILLS

- Excavator Operation
- Bulldozer Operation
- Front-end Loader Operation
- GPS Grade Control Monitors
- Scraper Operation
- Roller and Compactor Operation
- OSHA Trenching and Excavation Standards
- Preventive Maintenance
- Cut-and-Fill Calculations
- Soil Compaction Testing

CERTIFICATIONS

- Commercial Driver's License (Class A), Home state driver licensing agency, under FMCSA minimum standards, 2020

PROFESSIONAL EXPERIENCE

JOURNEYMAN OPERATING ENGINEER

CATAWBA BLUFF GRADING CO., MORGANTON, NC | 2023 – PRESENT

- Moved an average of 2,740 cubic yards of material per shift operating a front-end loader and scraper on a 4-mile highway realignment project.
- Completed 63 survey hours per quarter staking cut-and-fill sections with the project surveyor, reducing rework delays by 1.5 hours per week.
- Recorded 0 recordable safety incidents over 18 consecutive months by conducting walk-around inspections and enforcing PPE compliance in active cut zones.
- Drove and maneuvered a bulldozer in successive passes to strip topsoil and distribute select fill across embankment sections spanning 1,400 linear feet per day.

HEAVY EQUIPMENT OPERATOR

LINVILLE CREEK EXCAVATION LLC, MARION, NC | 2021 – 2023

- Loaded and relocated 1,870 cubic yards of rock and clay per shift using an excavator and off-road dump truck on a commercial pad preparation site.
- Logged 37 survey hours per month assisting layout crews with grade stakes, cut sheets, and benchmark verification before each grading pass.
- Operated a roller compactor to compact subgrade in 6-inch lifts, achieving density readings confirmed by nuclear gauge testing within 22 minutes of each pass.
- Maintained 1 recordable incident across a full calendar year by following OSHA trenching and excavation standards during utility corridor work.

EQUIPMENT OPERATOR TRAINEE

PISGAH HOLLOW SITE SERVICES INC., OLD FORT, NC | 2020 – 2021

- Operated a backhoe to pull stumps and rip deteriorated asphalt on residential demolition sites, clearing an average of 1,130 square feet per day.
- Completed 24 survey hours in the first 90 days by shadowing the site surveyor during control-point establishment and elevation checks.
- Performed pre-shift and post-shift fluid checks, greasing, and air-filter changes on a front-end loader and skid steer, cutting unplanned repair calls from 5 per month to 1 per month over 8 months.

EDUCATION

A.A.S. in Automotive Systems Technology

Catawba Valley Community College, Hickory, NC | 2018 – 2020
