

Kathleen Agarwal

Staff Optometrist

Doctor of Optometry with 7 years of clinical experience across comprehensive eye exams, cataract co-management, and contact lens fitting using OCT imaging, slit lamp biomicroscopy, and topography-guided measurements. Managed 113 pre- and post-operative cases over 12 months while completing an average of 87 contact lens fittings per month, including toric, multifocal, and scleral designs. Skilled in phoropter refraction, tonometry, visual field analysis, and EMR documentation.

EDUCATION

Doctor of Optometry
University of Alabama at Birmingham
School of Optometry, Birmingham, AL
2015 - 2019

KEY SKILLS

- OCT Imaging
- Slit Lamp Biomicroscopy
- Phoropter Refraction
- Contact Lens Fitting
- Tonometry
- Visual Field Analysis
- Retinoscopy
- EMR Documentation
- Cataract Co-Management
- HIPAA Compliance

PROFESSIONAL EXPERIENCE

Staff Optometrist | 2022 - Present

Flint Creek Eye Associates, Decatur, AL

- Managed 113 pre- and post-operative cases over 12 months by performing cataract and refractive surgery co-management evaluations, including OCT imaging and slit lamp assessments for surgical candidacy.
- Reduced average patient wait time from 27 to 14 minutes by redesigning the check-in sequence and staggering autorefractor and tonometer stations across 2 pre-testing lanes.
- Completed an average of 87 contact lens fittings per month, including toric, multifocal, and scleral designs, using topography-guided measurements and trial lens protocols.
- Consult with ophthalmologists on co-managed surgical patients and refer to retina specialists when OCT findings indicate macular pathology or advanced diabetic changes.
- Prescribe and adjust eyeglasses and contact lenses for a mixed-age caseload, verifying final prescriptions against phoropter findings and retinoscopy results.

Associate Optometrist | 2020 - 2022

Hartselle Family Vision Center, Hartselle, AL

- Performed pre-operative evaluations and 6-week post-operative follow-ups for 74 cataract co-management cases per year, documenting outcomes in the EMR system.
- Shortened patient wait time by 9 minutes per visit by batching visual field analyzer tests before scheduled exam slots, eliminating mid-day bottlenecks.
- Fitted an average of 63 contact lens patients per month, including 18 specialty lens cases requiring scleral or rigid gas-permeable designs.
- Refer patients with suspected narrow angles or intraocular pressure above 24 mmHg to the local ophthalmology group for further evaluation and treatment planning.

Optometrist | 2019 - 2020

Limestone Valley Eyecare, Athens, AL

- Coordinated pre- and post-operative care for 41 refractive surgery patients during the first year of practice, tracking healing milestones at 1-day, 1-week, and 1-month intervals.
- Cut patient wait time by 7 minutes by repositioning the autorefractor workstation adjacent to the exam room entrance and training staff on parallel workflows.
- Averaged 47 contact lens fittings per month across daily disposable, biweekly, and monthly replacement schedules for patients ages 12 to
