PROFESSIONAL EXPERIENCE

SQL DEVELOPER | GREENBRIER BASIN DATA GROUP, BUCKHANNON, WV | 2023 - PRESENT

- Delivered 9 database projects on time across 2 fiscal years by maintaining sprint schedules in JIRA and coordinating weekly code reviews with stakeholders.
- Designed and deployed SSIS packages that process 1.4 million transactional records daily from 4 upstream source systems into a centralized SQL Server warehouse.
- Completed a schema consolidation project 18 days ahead of the original schedule by scripting reusable migration templates in T-SQL.
- Wrote 23 stored procedures and 14 views supporting PCI-compliant payment reporting for the finance department.

SQL DEVELOPER | ELK RIVER TECHNICAL SERVICES LLC, CLARKSBURG, WV | 2021 - 2023

- Delivered 4 database migration projects on time by building detailed task breakdowns and tracking progress in Azure DevOps across 8-week cycles.
- Built Oracle PL/SQL procedures that processed 2.3 million daily log rows, loading cleaned records into reporting tables within a 3-hour batch window.
- Finished the customer analytics database redesign 27 days ahead of the planned go-live date, freeing the team to start the next sprint early.
- Created 11 parameterized SSRS dashboards used by operations managers to review order fulfillment metrics each morning.

JUNIOR SQL DEVELOPER | MONONGAHELA RIDGE SOLUTIONS, FAIRMONT, WV | 2020 - 2021

- Wrote T-SQL scripts to load and transform 870,000 daily shipment records from flat files into a normalized SQL Server schema.
- Completed a GDPR data-masking initiative 14 days before the compliance deadline by automating column-level obfuscation across 9 production tables.
- Maintained and tuned 34 scheduled SQL Agent jobs, keeping the nightly batch pipeline within its 4-hour processing window for 11 consecutive months.
