EDUCATION

BS (Radiologic Sciences), Diagnostic Medical Sonography Emphasis
Boise State University, Boise, ID
2017 - 2019

KEY SKILLS

- Abdominal Sonography
- OB/GYN Imaging
- Vascular Doppler Assessment
- GE Logiq P9
- PACS
- EMR Documentation
- HIPAA Compliance
- Patient Positioning
- Transducer Selection
- Supply Inventory Management

PROFESSIONAL EXPERIENCE

Senior Sonographer | Salmon Falls Regional Medical Center, Twin Falls, ID
2022 - Present

- Trained 8 junior technicians on abdominal, OB/GYN, and vascular scanning protocols over a 3-year period, guiding each through a 90-day competency checklist before independent practice.
- Completed 2,740 annual diagnostic procedures across ultrasound modalities, including abdominal, thyroid, and vascular Doppler studies on a GE Logiq P9.
- Reduced monthly supply costs from \$1,090 to \$637 by auditing gel, probe cover, and linen usage and renegotiating standing orders with the purchasing department.
- Obtained and verified patient histories, prior imaging results, and physician orders before each exam, maintaining HIPAA-compliant documentation in the EMR.
- Archived diagnostic images in PACS within 6 minutes of study completion, tagging each file with correct accession numbers and exam codes.

Staff Sonographer | Wood River Valley Imaging Center, Ketchum, ID
2020 - 2022

- Completed 1,870 annual diagnostic procedures including abdominal, pelvic, and small-parts ultrasound studies for outpatient and emergency referrals.
- Trained 3 junior technicians on transducer handling, patient positioning, and image annotation standards during a 4-month onboarding rotation.
- Maintained monthly supply expenditures at \$814 by tracking probe cover and coupling gel inventory weekly and reordering before stock fell below a 5-day buffer.
- Scheduled and coordinated 11 exams per day using the EMR scheduling module, reducing patient no-show gaps by contacting referrals 48 hours ahead.

Sonographer | Portneuf Creek Community Hospital, Pocatello, ID
2019 - 2020

- Completed 1,160 diagnostic procedures during the first year by scanning abdominal and OB/GYN cases on a Toshiba ultrasound system.
- Recorded sonographic measurements, patient demographics, and preliminary findings in the EMR within 7 minutes of each completed study.
- Kept monthly supply costs at \$748 by consolidating probe cover sizes and switching to a bulk gel supplier approved by the materials management team.
