- Azure DevOps
- Python
- SQL
- Agile SDLC
- STLC
- Functional Testing
- Smoke Testing
- Test Case Design
- Defect Triage

ABOUT ME

QA professional with 2 years of experience executing functional, smoke, and integration test cases while managing defect workflows in JIRA, Postman, and Azure DevOps. Achieved a 97.57% bug fix rate across 3 quarterly releases by categorizing each defect with structured severity rankings and step-by-step replication notes in JIRA, preventing backlog stalls.

PROFESSIONAL EXPERIENCE

Junior Test Engineer

Wabash Ridge Software LLC, Crawfordsville, IN | 2025 - Present

- Achieved a 97.57% bug fix rate across 3 quarterly releases by categorizing each defect with structured severity rankings and step-by-step replication notes in JIRA, preventing backlog stalls.
- Executed an average of 274 test cases per month covering functional, smoke, and integration scenarios for a web-based inventory management platform.
- Delivered 4 cross-functional workshops for developers and product managers, aligning defect prioritization criteria and cutting back-and-forth clarification messages by 38 per sprint.
- Documented request-response discrepancies from API checks in Postman and tracked each one to resolution with the development team.

QA Test Intern

Sugar Creek Analytics Group, Lafayette, IN | 2024 - 2025

- Executed 137 predefined test cases per month across 2 internal applications, logging results in Azure DevOps and flagging 11 blocking issues before each sprint review.
- Assisted senior engineers in designing 23 new test cases for a customer portal module, covering form validation and session timeout scenarios.
- Prepared a cross-functional workshop on defect lifecycle reporting attended by 17 participants from QA, development, and product teams, improving bug submission completeness scores from 64 to 81 out of 100.

EDUCATION

BS Computer Science

Purdue University, West Lafayette, IN | 2020 - 2024
