

Farid Kaur

Packaging Supervisor

Packaging supervisor with 12 years of experience managing crews, controlling costs, and maintaining throughput across warehouse and fulfillment operations. Sustained 97.95% daily quota attainment across a 14-person packing crew by adjusting workstation assignments and break rotations based on real-time order volume. Cut annual packaging supply costs by \$16,310 by renegotiating vendor contracts and standardizing container sizes, while processing 274 orders per shift using SAP and conveyor belt systems.

KEY SKILLS

- SAP
- RF Scanner Operations
- Banding Equipment
- Stretch Wrap Systems
- Pallet Jack Operation
- Microsoft Excel
- OSHA Compliance
- FIFO Inventory Rotation
- Conveyor Belt Systems
- KPI Tracking and Reporting

PROFESSIONAL EXPERIENCE

- **Packaging Supervisor, Purgatoire Valley Consumer Goods Co., Trinidad, CO**
2019 – Present
 - Sustained daily quota attainment of 97.95% across a 14-person packing crew by adjusting workstation assignments and break rotations based on real-time order volume.
 - Cut annual packaging supply costs by \$16,310 by renegotiating carton and stretch-wrap vendor contracts and standardizing container sizes across 4 product families.
 - Processed 274 orders per shift by sequencing pick-release batches in SAP and staging outbound pallets at assigned dock doors within 35 minutes of carrier arrival.
 - Sealed specialty containers using adhesive applicators, banding equipment, and manual fasteners, inspecting each closure point against the product spec sheet before release.
 - Removed defective cartons from the conveyor belt during in-line QC checks, routing them to a rework station where the team corrected an average of 19 cases per day.
- **Packaging Lead, Spanish Peaks Distribution LLC, Walsenburg, CO**
2016 – 2019
 - Increased orders processed per shift from 198 to 241 by reorganizing staging lanes and introducing wave-based pack sequencing for high-volume SKUs.
 - Reduced operation costs by \$9,870 per year by switching from single-use dunnage to reusable foam inserts across 6 packing stations.
 - Tracked daily quota attainment in Microsoft Excel, publishing shift scorecards that kept the team at or above 98.13% for 11 consecutive months.
 - Directed placement of completed pallets onto conveyor systems and loading docks, coordinating with forklift operators to clear staging areas every 90 minutes.
- **Packer, Raton Pass Fulfillment Group, Raton, NM**
2014 – 2016
 - Processed 187 orders per shift by scanning items with an RF scanner, selecting the correct carton size, and applying shipping labels before conveyor handoff.
 - Saved \$5,240 annually by identifying and reporting excess void-fill usage, leading to a revised packing instruction card for 9 product lines.
 - Sealed cases using tape guns, glue applicators, and hand tools, verifying weight against spec tolerances on a bench scale before moving cartons to

the loading dock.
